

ACCESS RISK ANALYSIS · 100% LOCAL

From months to minutes.

Portable Segregation of Duties & access risk analysis for SAP and any ERP. Built for compliance, security and audit teams that need fast answers, defensible findings and a price tag that makes sense, without ripping out your existing GRC stack.

Minutes

Full system analysis on a laptop

100% local

Data never leaves your network

Modular

Pay only for the modules you use

CORE CAPABILITIES

● Risk Analysis

Cross-system SoD & Critical Access at user and role level. Multi-system support out of the box.

● User & Role Explorer

Drill into authorisations, transactions and assignments. Understand any role in seconds.

● Executive Reporting

Audit-ready dashboards and exports. Tell the risk story to leadership in one click.

● Technical Documentation

Full ruleset, role and authorisation documentation generated on demand.

● AI-Native (MCP)

Embedded assistant + Model Context Protocol server. Bring your own LLM, zero cloud exposure.

● Multi-System

SAP ECC, S/4HANA and any ERP. Connect via RFC or CSV import. Your data stays on-prem.
